Soft Touch Furniture's Chairs are Different

Wood Quality. Soft Touch Furniture's chairs are made exclusively from 100% European beech hardwood. Wood components are thick and strong.

Workmanship. The mortise and tenon wooden components are glued, pinned, and screwed for sturdy assembly. Corner blocks are added under the seats for extra strength.

Finishes. All chairs are hand-sanded, even between back rungs and along stretchers. Stains are hand-wiped for even color distribution and covered with a durable catalyzed lacquer that resists cracking and chipping.

Custom Stain Colors. Soft Touch Furniture provides a full custom color matching service.

Upholstery. An in-house upholstery shop gives customers flexibility in choosing fabrics and vinyls.

The samples shown reflect only the color of the finish. Because of the distinctive characteristics of wood, minor variations in color, texture, and grain may occur. Therefore, the furniture you receive may not be a perfect match to the samples shown.

Because of the nature of wood and the changes in grain and color from forest to forest and tree to tree, we cannot guarantee an exact match to the Natural color sample. We do, however, presort components for color consistency for all Natural orders from available stock.
